This is the optional preamble (an untitled section body). Useful for writing simple sectionless documents consisting only of a preamble.

The abstract, preface, appendix, bibliography, glossary and index section titles are significant (*specialsections*).

The optional abstract (one or more paragraphs) goes here.

This document is an AsciiDoc article skeleton containing briefly annotated element placeholders plus a couple of example index entries and footnotes.

## 1. The First Section

Article sections start at level 1 and can be nested up to four levels deep. 1

And now for something completely different: monkeys, lions and tigers (Bengal and Siberian) using the alternative syntax index entries.

Note that multi-entry terms generate separate index entries.

Here are a couple of image examples: an NEW example inline image followed by an example block image:
